

DAY 04

Build Something Shareable.

Tools that spread. Tools that earn.

KASICODE

by Prestige Platform

App: AI Quiz Generator with lead capture

New: Build a paywall + collect leads

3 Hours · Day 4 of 5

The day your tool becomes a product

kasicode.app

Day 4. One day from the finish line.

✓ 3 tools built · ✓ Data that saves · Today: tools that spread and earn.

0:00 – 0:30

Tools vs Products

The shift from building for yourself to building for others

← WE ARE HERE

0:30 – 1:45

Build the Quiz Generator

AI generates quizzes on any topic — shareable link, live scoring

1:45 – 2:15

Add Lead Capture

Gate results behind a name and number — your first lead funnel

2:15 – 2:45

The Monetisation Talk

Paywalls, Yoco, pricing, selling to other businesses

2:45 – 3:00

Demo + Day 5 Preview

Share live, demo your quiz, prepare your Day 5 build

A tool serves you.

A product serves others.

Days 1–3 you built for yourself. Today you cross the line.

A TOOL (Days 1–3)

- You use it
- Lives on your device
- Solves your specific problem
- Value = time saved for you
- Success = it works

A PRODUCT (Day 4+)

- Others use it
- Shared via a link
- Solves a category of problems
- Value = what others pay for it
- Success = it earns

Build the share button before the save button.

Tools that spread make money. Tools that sit in your phone don't.

One link. Any device.

Your tool needs a URL anyone can open on any phone, anywhere. No download, no login, no friction. If it takes more than 3 seconds to access, you'll lose half your audience.

Built for a specific audience

"A quiz app" spreads slowly. "A quiz app for Grade 12 Maths teachers" spreads through a community. Specificity creates word of mouth.

Built-in motivation to share

Quiz results are inherently shareable. Scores, certificates, rankings — people share what makes them look good. Design for that moment.

WhatsApp is your distribution

Every share button should open WhatsApp with a pre-filled message. That single feature turns a tool into a campaign. SA-native by design.

Today's build:

AI Quiz Generator

+ Lead Capture Gate

Type a topic. AI generates a 10-question quiz. Anyone can take it via a shareable link.

They must enter their name and WhatsApp number before seeing their results.

Any topic

AI generates the questions

Shareable link

anyone can take it

Lead capture

name + WhatsApp required

Paywall ready

charge for results

AI Quiz Generator — the complete flow

1

**You type a topic**

"Grade 10 Maths" · "SA History" · "Food Safety for Staff" · Any topic. AI generates 10 questions with 4 options each.

2

**Share the link**

Your quiz gets a unique URL. Paste it in WhatsApp, post on social media, email it to students. Anyone clicks and starts.

3

**Lead gate appears**

Before results show, the user must enter their name and WhatsApp number. You collect every participant automatically.

4

**Score + certificate**

They see their score, a pass/fail message, and a shareable certificate. The certificate includes your business name. Free marketing.

Open KasiCode. Type this prompt.

This one is longer — more features, more power. Take your time and customise it.

YOUR PROMPT

Build me an AI Quiz Generator app.

The quiz creator (me) types a topic and clicks "Generate Quiz". The AI creates 10 multiple-choice questions with 4 options each and one correct answer. Show one question at a time.

Before showing the final score, show a lead capture form: the user must enter their name and WhatsApp number. Then show: their score, a pass/fail message (pass = 70%+), and a "Share my result via WhatsApp" button.

Show a "Results" tab where I (the creator) can see all leads collected — name, number, score, date. Make it mobile-friendly with a clean, professional design. Use [your brand colour] as the main colour.

💡 The Results tab is your lead database. Every person who takes your quiz becomes a contact.

75 minutes. Build your first product.

PHASE 1

0–20 min

Get the quiz working

Type the prompt into KasiCode

Generate a quiz on any topic you know

Answer all 10 questions yourself

Check the score and results screen

PHASE 2

20–55 min

Lead gate + customise

Confirm the lead capture form works

Test: fill in your name and WhatsApp number

Check the Results tab shows your entry

Customise colours and branding

PHASE 3

55–75 min

Share and collect leads

Share your quiz link in the WhatsApp group

Everyone takes someone else's quiz

Check your Results tab — who entered?

Prepare your 90-second demo for the group

Customise and fix with these prompts.

Use any of these to improve your quiz generator.

Change the passing score

"Change the pass mark from 70% to [your %]. Show a different congratulations message for scores above 90%."

Add a timer per question

"Add a 30-second countdown timer for each question. If time runs out, move to the next question automatically."

Add a certificate

"For students who pass, generate a certificate showing their name, topic, score, and date. Add a 'Download Certificate' button."

Add difficulty levels

"Add a difficulty selector: Easy, Medium, Hard. Generate harder questions when Hard is selected."

Make the lead form look better

"The lead capture form looks plain. Make it more welcoming — a friendly heading, better spacing, and a motivating message before they submit."

Add a leaderboard

"Add a leaderboard tab showing the top 10 scores of all time — name, score, and date. Update it automatically after each quiz."

Restrict to one attempt

"Track if a device has already taken this quiz using localStorage. Show a 'You have already completed this quiz' message if they try again."

Send WhatsApp confirmation

"After the lead form is submitted, create a WhatsApp message the user can send to themselves with their name, score, and a congratulations message."

Let's talk about money.

Every tool you've built this week can generate income. Here's exactly how.

Paywall — charge for results

Add a Yoco payment link. User pays R20–50 before seeing their score. For a quiz with 100 takers/month, that's R2 000–5 000 with zero ongoing work.

Lead generation — sell the list

Your Results tab is a database of people interested in your topic. Tutors, training companies, and recruiters will pay for warm leads.

Sell the tool to other businesses

A hair salon needs a staff product knowledge quiz. A school needs grade assessments. A franchise needs training tests. One build, sold to many. R500–1 500/build.

Subscription access

Charge businesses R200–500/month to use your quiz platform to create unlimited quizzes for their staff or customers. White-label it under their brand.

How to charge for your quiz results.

No developer needed. Three steps, all done today.

Create a Yoco Payment Link

1

Go to yoco.com → Dashboard → Payment Links → Create Link.

Set the amount (e.g. R25). Give it a name like 'Quiz Results'.

Copy the link — it looks like pay.yoco.com/yourname.

Add the paywall to your quiz

2

Use this prompt:

"After the lead form is submitted, show a payment required screen.

Display: 'Pay R25 to unlock your full results' with a button linking to [your Yoco link].

Add a 'I have paid' button that reveals the score and certificate."

Test the full flow

3

Go through the quiz as a real user.

Check: lead capture → payment screen → Yoco link opens → return → results show.

Share with one real person and watch them complete it.

Every business you know needs a quiz tool.

You built it. Now think about who you could sell it to.

Schools & Tutors

R200–
500/mo

Grade assessments, subject quizzes, end-of-topic tests. Teachers pay R200–500/month to avoid building their own.

HR Departments

R300–
800/mo

Pre-employment screening, staff knowledge checks, onboarding tests. Companies pay per candidate or monthly.

Franchises

R1 000–3
000/mo

Product knowledge tests, compliance checks, staff certification. One quiz used across 20 branches. Major time saver.

Training Companies

R500–2
000/mo

Course completion quizzes, certification tests, CPD tracking. Learning platforms pay premium for built-in quizzing.

Food Businesses

R150–
400/mo

Health and safety compliance quizzes for staff. Required by law in many establishments. Recurring need.

Marketers

R500–1
500 once

Lead generation quizzes — 'What type of business owner are you?' — viral content with built-in email/number capture.

Your first real users. Right now. In this room.

Share your quiz link in the WhatsApp group now. Everyone takes someone else's quiz.

Watch what happens

Does the quiz load instantly? Can they answer on their phone? Is anything confusing? Real feedback in real time.

Check your Results tab

After a few people take your quiz, open the Results tab. You'll see real names and numbers. That's your lead list.

Fix one thing live

If something looks wrong or confusing, describe it to KasiCode AI and fix it immediately. Show the group the before and after.

Ask one person

Find one person who took your quiz. Ask: 'What was confusing? What would make you share this with someone else?'

Demo Time.

Show your quiz. Show your leads. Show the money.

Generate a quiz live

Pick a topic. Hit generate. Show us the questions appearing. 30 seconds.

Show your Results tab

How many leads did you collect during the group test?
Show the names and numbers.

Show the paywall (if added)

Walk us through the payment screen. Explain how the Yoco link works.

Tell us your business plan

Who would you sell this to? How much would you charge?
Be specific.

Four days. An impossible amount of value.

DAY 1 **Business Idea Validator** **R2 000–5 000**

once-off

DAY 2 **Customer Quote Generator** **R400–800/mo**

SaaS

DAY 3 **Customer & Stock Tracker** **R300–600/mo**

SaaS

DAY 4 **AI Quiz Generator + Lead Capture** **R500–2 000/mo**

Product

Four days. R3 000–8 400/month in tools + products. One day still to go — your own idea.

R500–1 000 spent

Four days. You think like a product builder.

Tools vs Products

You crossed the line. Day 4 built something designed for others, not just yourself.

Virality by design

The share button, the WhatsApp link, the lead capture — all features that make tools spread.

Lead generation

Your Results tab is a real lead database. Every quiz taker is a potential customer — you captured them automatically.

Paywall mechanics

You now understand how to put a price on any digital tool using Yoco Payment Links. No developer, no complexity.

B2B opportunity

The quiz tool you built in 90 minutes is something schools, HR teams, and franchises will pay R300–2 000/month for.

Multiple revenue models

One tool, four ways to earn: paywall, lead sale, B2B subscription, or one-off builds for clients.

Tomorrow you build your own idea.

Day 5 is the most important day of the cohort. Tonight's task gets you ready.

TONIGHT'S TASK — fill in this spec for your Day 5 app

1. What is it called?
2. Who uses it — you, staff, or customers?
3. What do they put in — list every field?
4. What do they get back — the exact output?
5. Does it need to save data? What data?
6. Who else needs to see it?
7. Should it work offline?
8. What should it look like — colours, feel?
9. What must it do perfectly?
10. What would make you share it?

Bonus tasks tonight:

Send your quiz link to 5 real people

Anyone outside the cohort. Collect 5 real leads. Bring the results tomorrow.

Add your quiz link to your WhatsApp status

One story, potentially hundreds of viewers. See what happens.

Decide: is your Day 5 build a tool or a product?

If it's a product, who buys it, and what would they pay?

Tomorrow is the big one.

Day 5 — Ship Your Own Idea

Build the one tool your business actually needs. Deploy it live. Show the world.

Guided Build

Your spec becomes your prompt. We guide every step. You build exactly what your business needs.

Deploy Live

Netlify Drop. Five minutes. Your app gets a live URL you can share with real customers today.

Graduation

Demo day, certificate, affiliate invite, the KasiCode subscription offer. The journey starts here.
